The Ethiopian Revolution 1974 - And The Exodus Of Ethiopia’s Trained Human Resources

Examining the factors that contributed to the exodus of trained Ethiopians to the US, this work explores their conditions and integration into American society, as well as their adjustment and the utilization of their training and professional experience. It identifies the probable political and economic developments in Ethiopia that may attract Ethiopians who live and work in the US. This study addresses a general problem faced by many African countries.

Ethiopia: the Ethiopian Revolution 1974-1987: A Transformation from an Aristocratic to a Totalitarian Autocracy by Christopher Clapham

This book is a comprehensive account of the Ethiopian revolution, dealing with the entire span of the revolutionary government’s life. Particular emphasis is placed on effectively isolating and analyzing the causes and outcomes of the revolution. The author traces the revolution’s roots in the weaknesses of the autocratic regime of Haile Selassie, examines the formative years of the revolution in the mid-seventies, when the ideology of nationalism, the legacy of the Amhara kingdom and the leadership of Tigray were first recognized. The next stage, from Haile Selassie’s flight in 1974 to the adoption of a new constitution in 1987. In examining these events, Dr. Clapham stresses the decisive role of the TPLF and its leader, the late Meles Zenawi, who was the first Ethiopian nation to write a book on this subject. This book is thus a unique account of a fascinating period, capturing the mood of the revolution as never before, yet firmly grounded in scholarship.

European Essays as Blueprints for Ethiopia by Fantahun Ayele

This book is a contribution to the global history of the transfer of political ideas, as exemplified by the case of modern Ethiopia. Like many non-European nations-states, Ethiopia adopted a western model of statehood, that is, one that organizes society in terms of the state and the societal role of the state. This book argues that the Ethiopian people remained the quarrel of Ethiopian politics nowadays. The book will be useful for scholars of Ethiopian and African history and politics, and also offers a case in comparative studies on the subject of different models of national development.

often carried out without the active support of broader society. Mass killing, in his view, is a brutal political or military strategy designed to accomplish leaders’ most important objectives, counter threats to their power, and solve their most difficult problems. In order to capture the full scope of mass killing during the twentieth century, Valentine does not limit his analysis to violence directed against ethnic groups, or to the attempt to destroy victim groups as such, as do most previous studies of genocide. Rather, he defines mass killing broadly as the intentional killing of a massive number of noncombatants, using the criteria of 50,000 or more deaths within five years as a quantitative standard. Final Solutions focuses on three types of mass killing: communist mass killings like the ones carried out in the Soviet Union, China, and Cambodia; ethnic genocides as in Armenia, Nazi Germany, and Rwanda; and “counter-guerilla” campaigns including the brutal civil war in Guatemala and the Soviet occupation of Afghanistan. Valentine closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing.

Final Solutions - Benjamin A. Valentino - 2013-01-19

Benjamin A. Valentino finds that ethnic hatreds or discrimination, undemocratic systems of government, and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed. He shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society. Mass killing, in his view, is a brutal political or military strategy designed to accomplish leaders’ most important objectives, counter threats to their power, and solve their most difficult problems.
